

Protection to Fruit Trees.
To prevent rabbits from killing young fruit trees, I cut up the long coarse prairie grass, which grows about six feet in height in all the bottom and low places in almost all parts of Illinois; bind it in bundles at each end, and with an ax cut it in two in the middle. Each part will be three feet long, which is as high as a rabbit can reach. Take enough of this grass to cover the top of the tree, and tie a string around the top of the grass after it is put around the tree, and tie it again about half way down; hoe a little earth around the grass at the bottom, and tread it down. This covering will remain firm until grass grows in the spring, when the rabbits cease eating the bark of the trees; the grass should now be removed. This will not injure the trees, and is cheaper than any other plan that I have tried. I tried grease, tar, tobacco, aloes, sulphur, &c., but find that grease and tar injure the trees and everything of the kind becomes useless before winter is over—frosts, sun, rain, sleet, and snow wear them away; and I have often seen where the deer have peeled trees when covered with either tar or sulphur. Should deer, sheep, calves, colts, cattle, rats, or mice, by any means get into your orchard, they will not disturb the coarse dry grass. I have fixed my young trees in this way for the last twenty years, and have not lost a tree.—*Cor. Prairie Farmer.*

STRANGE NOISES.—A correspondent of the Florida *Scout*, states that on the 5th of Oct., about midday, a strange rumbling noise was heard at Tallahassee, in the heavens, resembling the distant thunder or the rolling of cars on the railroad or more nearly the discharge of steam under water. The air was perfectly calm, the sky cloudless though the atmosphere was filled, as common at this season, with a dull, misty haze—thermometer about 70 or 80. Repeated very distant in the upper regions, though the sound some what resembled that of large birds descending very suddenly, and continued from a quarter to half a minute.

In explanation of the above he says: "It is quite possible to have originated in some meteorological phenomena, possibly a long and dense body of meteoric stones passing through the earth's atmosphere. The common course of these currents are nearly parallel with the earth's surface, from the rapidity of their movement and when that ion is overcome by the force of gravitation, and the fall upon it. It may be that they have continued for thousands of miles, before they were finally overcome by this agent and they may possibly not have fallen short of the Pacific Ocean or South Pole. The course of the noise was from north to south, and continued in that direction, gradually retreating. Had it been cloudy it certainly would have passed off as distant thunder; and had it occurred in the night there would quite likely have been a long train of light, or of blazing sparks."

THE LADIES CAN TELL.—The editor of the Louisville *Press*, on his way home the other night, picked up a very extraordinary piece of decoration, belonging to some young woman. He appeared to be at a loss what to call it. We presume, however, that some of our female acquaintances could give him light upon the subject. Hear him describe it: "It is shaped, or rather it was, a good deal like a recent half-moon like an India rubber life-preserver, and somewhat like a pig yoke; felt a little soft, and was covered with bed ticking. We had nearly broke our neck over it, and as we never had any luck in our life, we thought may be we had found a treasure at last. We did not know but it was a new way the banks had adopted of making remittances so as to prevent robbery, for the ugly thing had a string at each end so that in an emergency a man might tie it around him and carry it a short distance. With anxious hands, therefore, we seized our knife and tore into it, it split six inches, and the first thing that protruded itself from the crevice was an old roundabout, and then in rapid succession, three short shirts and two long ones, and old for cap, and a pair of breeches, old and ragged, the skirt of an old calico dress, a pair of old calico drawers with fringed bottoms, four old night-caps, two cradle blankets, one leghorn bonnet, one old morocco boot, two table cloths, ten small pieces of diaper, very much worn, an old piano cover, two long night gowns, one ragged waist-coat, three quilted petticoats and six pillows. What on earth could these things be? Do tell!" *Ex. paper.*

Well, the editor does make a great puzzle about small matters.—(Printer's Imp.)

ANecdote of SCHONBERG'S GUN CORPUS.—When Mr. S. attended at the Osborne House to exhibit the qualities of his gun cotton to Prince Albert, he offered to explode a portion on the hand of Col. B—; but the gallant Colonel recoiled from the experiment, and would have nothing to do with the novel powder. Prince Albert himself, however, submitted to the test, and off went the cotton, without smoke, stain, or burning of the skin. Thus encouraged, the Colonel took his turn; but whether the material was changed or not for the coarser preparation, it gave him such a stinging that he leaped up with a cry of pain. A hearty laugh was all the commiseration he received. After this Mr. S. loaded a fowling piece with cotton in the place of powder, and the Prince fired both ball and shot from it with the usual effect and perfect impunity.

A GREATFUL BROWN.—You saved my life on one occasion, said a beggar to a captain under whom he had served. "Saved your life?" replied he, "do you think I am a doctor?" "No," answered the man, "but I served under you in the battle of Waterloo, and when you ran away, I followed you."

Not long since a company of young men went into a certain delicatessen store in this town, and, after purchasing a supply of cigars, sat down and began smoking them, when they were told by the storekeeper that they either stop smoking or walk out. "Fine business," replied the smokers, "to sell people cigars, and not allow smoking." The druggist replied that he kept "pukes" for sale, but he did not expect people to make use of the article on his premises. Suffice it to say, the smokers sloped. *(Lynn Farmer.)*

To the public.
THE HOME JOURNAL.
The first number of a new series of the National Press, remodeled and improved, will be issued on Saturday next, 21st Nov., under the title of the HOME JOURNAL. The necessity of constantly correcting in impression that the "National Press" is a political paper, has induced the undersigned editors to express its character more distinctly by putting forward the name which has hitherto been only secondary in its title. The general design of the Home Journal will be, to furnish entertaining reading, to make a brief and complete chronic of passing events, to give the cream of new books, to keep a watchful look-out for Genes in literature, music and art, and to keep up with the times. This plan will be aided by short and varied foreign and domestic news, and can find new and valuable attractions; but our main purpose will be constantly kept in view, viz: to issue a periodical which, by its scope and comprehensive contents, shall suffice for families that wish to take a paper. At the small sum of two dollars per annum, no important and interesting family is without a means of staying at \$3 per annum, invariably in advance. Three copies will be sent to one address, or any price the United States is repaid in strong wrappers, for five dollars in advance.

Post Masters are requested to act as agents, receive subscriptions and make remittances. No notice should be given unless made immediately, will be supplied with the first number of the new series.

All communications to be addressed (most post) to the undersigned, at 107, F. M. street, New York.

GEO. P. MORRIS.
N. Y. WILLIS.

WINERS

Canadian Vermifuge.
The remedy to which we would call the attention of the public, is one which has proved successful for some time; and it is universally acknowledged by all who have tried it, to be superior to any other medicine ever employed in cases for which it is recommended. It not only destroys worms and invigorates the whole system, but it dissolves and carries off the superabundant slime or mucus, so prevalent in the stomach and bowels of children, more especially those in bad health. The mucus forms the bed or nest in which worms produce their young, and by removing it, it is impossible for worms to remain in the body. It is harmless in its effects on the system, and the health of the person is always improved by its use, even when no worms are discovered.

It will be seen by the following statement that Mr. McCord had, previous to using "Winners' Canadian Vermifuge," resorted to various preparations recommended for worms, without any advantage—this of itself, is sufficient to the superiority of this preparation over all others for similar purposes.

Brooklyn, January 13th, 1846.

Messrs. John Winer and Co.—Sirs: I am happy to have it in my power to bear testimony of the good effects attending the use of your Canadian Vermifuge.

My child of two years of age, had been ill for some seven months, and had finally become so emaciated, that we despaired of his recovery. Supposing the cause of his sickness was worms, we gave her various medicines recommended in a sickness, but they produced no beneficial effect. We had given her up as past recovery, when we were recommended by a friend, who had heard of your medicine, to give it a trial. We did so without any expectation of its being successful, but to our great joy and surprise, after she had taken six doses, and six days, she began gradually to recover, and is now in better health than she has been for ten months.

I can now recommend your "Canadian Vermifuge" with the greatest confidence, and as a friend to the young portion of the human family, who suffer from worms. I am glad to be able to give such decided evidence in the success of your medicine, and am willing you should refer to us any persons who may have doubts on this point.

Yours truly,
GILES McCORD.

The "Canadian Vermifuge" is only 25 cents per bottle and is much pleasanter than any in use. Prepared only by John Winer & Co., 83 Michigan Street, N. Y. Sold by CHAS. CLEMENT, agent for Joliet; also by L. M. BOYCE, agent for Chicago.

CLEMENT'S INDIAN TONIC.
Infallible cure for Chills or Ague & Fever.
And a Sure Remedy for Bilious, Remittent and other Fevers.

This Invaluable Medicine is purely vegetable.

The unexampled success of this truly unique Tonic, in curing in a few hours cases all other remedies have failed, and that ten, in cases of from six months to ten years standing—warrants the assertion, that if taken according to the directions, it is infallible. A long list of certificates in proof of its infallibility, might be added; but those upon the wrapper are deemed sufficient.

It is not in the least nauseating, and it does not operate upon the bowels; but its salutary action upon the whole system is so charming, that every one is highly delighted at their speedy recovery. Such a remedy, the afflicted have long been in want of, one that cures speedily and permanently, where the usual caution to improve exposure is observed.

From the great popularity of this medicine, many imitations professing to be CLEMENT'S INDIAN TONIC, are all over the country. Be sure to ask for that prepared by GEO. W. HOUSE, Nashville, Tennessee, who is sole proprietor.

CAUTION.—To prevent frauds upon the directions upon the bottle, the written signature of Geo. W. House, also imprinted in the bottle as Indian, with the words "Clement's Indian Tonic," prepared by Geo. W. House, All others are counterfeit.

For sale by BROWN & CO., Joliet.

DR. BRAGG'S
Indian Queen Vegetable
Sugar Coated Pills
COMPRISE the Tonic and Anti-Pyrexia. The most successful medicine ever offered to the public for the treatment and cure of Ague and Fever, Chills and Fever, Biliousness, Remittent and Intermittent Fevers. In intermittents or agues, or agues, derangement has taken place. These Pills never fail to make a permanent and lasting cure, within twelve to eighteen hours, without the aid of any other medicine. So great indeed has been their efficacy, that a permanent cure has always been obtained—directions strictly followed. But this medicine has now become a generally known, and so extensively used, throughout the western and south-western States, that such a warranty is not longer asked or expected.

THE INDIAN QUEEN VEGETABLE SUGAR COATED TONIC PILLS.
Will be found highly beneficial in all cases of debility, especially in those cases produced by ague and long continued attacks of Fever, and in promoting digestion. From one to three of these Pills taken 20 or 30 minutes before eating, will seldom fail to excite a healthy appetite, promote digestion, give tone to the stomach, and invigorate the system generally. Price \$1.00.

Dr. Bragg's Sugar Coated Pills have been thoroughly tried, and long experience has established their superior efficacy over every other medicine offered to the public for the radical cure of every form of disease, and particularly in those bilious affections so prevalent through out our southern and western States. The proof of this is found in the fact that those who have once used these Pills, have ever after preferred them, and resorted to their use in preference to any other kind of medicine, and especially at the commencement of each yearly season for the curable medicine—and urging their friends to do the same. Innumerable cases of chills and fever, and of long standing, have been so suddenly cured by Bragg's Pills, that their effects have almost appeared miraculous. Let the patient who doubts this try them, and he will find himself equally delighted and astonished.

Oath before the Mayor.
State of Missouri, Do. A. G. Bragg, Mayor of the City of St. Louis, being duly sworn, deposes and says, that his Sugar Coated Pills, and so generally known throughout the southern and western States, do not contain one particle of Mineral of any kind, as has been erroneously stated. He further states that he is at this time manufacturing and putting up ready for market 25 to 30,000 boxes of these Pills per month, and that he has received orders from agents and others for these Pills, have become so numerous, even at this healthy season of the year, that some applications are necessarily delayed from ten to twelve days, on account of the impossibility to manufacture them fast enough to supply the increasing demand. Dr. Bragg further states, that it is his intention to extend and increase his manufacturing, and can furnish the southern and western States with an ample supply of this celebrated pill.

Sworn to, and subscribed before me, this 9th day of June, A. D. 1846. P. G. CAMDEN, Mayor of the City of St. Louis.

For Sale by Jeremiah Lewis, Wesley Cleveland, Asa McDonald, and M. Wheeler, Hickory Creek; John S. Dillon, Marquette; Robert Peacock, Morris; Matteson & Campbell, Ash Grove; A. Pelletier, Decatur; Samuel L. Palmer, Kankakee; D. Watson, Hallowell; P. Boucher, Burlington; George W. Wood, Crete; Edward Poor, Vanhook Settlement; J. J. Willcox, J. A. MATTHESON, Joliet.

DR. HULL'S
COUGH LOZENGES
ARE now acknowledged by the Faculty to be the most scientific and successful preparation ever discovered for the relief of coughs, colds, croup, whooping cough, croup, tightness of the lungs or chest, bronchitis, and similar pulmonary affections. They are made from the most valuable expectorant or cough medicines, and are undoubtedly superior to everything else for these complaints.

Sold by Brown & Co., Joliet; W. S. MYERS, Lockport.

JEDDIAH WOOLLEY JR.,
SURVEYOR AND AGENCY OFFICE,
CHICAGO STREET, JOLIET, ILL.
Will attend to Surveying or giving descriptions of land or Town lots in Will, Kendall, Grundy, or La-Salle counties: or all those who shall favor him with a call, will have at all times on hand Maps of the above counties, with correct delineations of Timber and Prairie Lands, and falls of water wherever they occur, either on the Des Plaines, Du Page, Kankakee, or Illinois rivers; and also the principal Roads; together with a representation of the Illinois & Michigan Canal.

The experience Mr. Woolley has had as Surveyor of the above counties in the last five years will warrant him in saying that he can give general satisfaction.

In all cases his charges will be reasonable, and prompt in his attention to business. His office nearly opposite the Eagle Tavern.

THIS FOUND AT LAST

WISTAR'S BALM OF WILD CHERRY
The great American remedy for Consumption of the Lungs, Affections of the Liver, Asthma, Bronchitis, Pain or Weakness in the Breast of Lunged Chronic Coughs, Pleurisy, Hemorrhage of Lungs, and all Affections of the Pulmonary Organs—Nature's own prescription.

The Moss of Iceland, the Wild Cherry Bark and Pine of our Northern Latitudes are the principal ingredients in the compound. The great secret of its efficacy consists in the method in which it is prepared. Such in fact is the nature and simplicity of this medicine, so mild and safe and pleasant in its operation, that it must justly be termed "Nature's own Prescription," and although but two years have elapsed since it was first made public, we can proudly say it has acquired a celebrity unobtainable by any medicine in use, and evidently destined to become one of the most popular and valuable medicines ever discovered.

This great remedy for all diseases of the lungs continues to read joy and happiness to many a cheerless being; and still there is room to diffuse its health giving magical wand, Whosoever will, let him come and be cured.

WILL MIRACLES NEVER CEASE? More evidence of its surpassing health restorative virtues. From Dr. Baker, Springfield, Washington Co., Kentucky.

Springfield, Ky. May 15, 1845.

GENTS: I take this opportunity of informing you of a most remarkable cure performed on me by the use of Wistar's Balm of Wild Cherry.

In the year 1810 I was taken with an inflammation of the bowels, which I labored under for six weeks, when I gradually recovered. In the fall of 1811 I was attacked with a severe cold, which continued on my lungs, and for the space of three years I was confined to my bed. I tried all kinds of medicines and every variety of medical aid without benefit, and that I learned almost until the winter of 1814, when I heard of Wistar's Balm of Wild Cherry.

My friends induced me to give it a trial, though I had given up all hopes of recovery, and had prepared myself for another winter. Through their solicitation I was induced to make use of the "Genuine Wistar's Balm of Wild Cherry." The effect was truly astonishing! After five years of affliction, pain and suffering, and after having spent four or five hundred dollars to no purpose, and the best and most respectable physicians had proved unavailing, I was restored to health by the use of Wistar's Balm of Wild Cherry.

I am now enjoying good health, and such is my altered appearance, that I am no longer known when I meet my former acquaintances.

I have gained rapidly in weight, and my flesh is firm and solid. I can now eat as much as any person, and my food seems to agree with me. I have eaten more during the last six months than I had for five years before.

Considering my case almost a miracle, I deem it necessary for the good of the afflicted, and a duty I owe to the proprietors and my fellow men, (who should know where relief may be had) to make the subject public.

Many the blessings of God rest upon the proprietors of this valuable medicine as Wistar's Balm of Wild Cherry. Very respectfully, W. S. MATTHESON, Joliet.

We might publish a thousand certificates, but do not deem it necessary, knowing that a single trial will do more to establish its efficacy than a volume of testimonials. There are hundreds of Balmers recommended as positive specifics for pulmonary diseases; but when the evidence of these purveyors is taken, every one is disappointed. In case like the one mentioned above, the Balm of Wild Cherry is the only remedy that will cure it.

Believe not the cunningly wrought fabrications and take only the original and genuine WISTAR'S BALM OF WILD CHERRY, or you will be disappointed.

Wistar's Balm, comes of Tree & Chestnut, St. Louis, Mo., General Agent for the West. The true and only genuine Wistar's Balm of Wild Cherry is sold by J. A. Mattheson & Co., Morris, A. Pelletier, Decatur, H. D. Hiley & Co., Hallowell, E. E. Bush, Lockport, L. M. & S. S. Newark, and by J. A. MATTHESON, Joliet.

ADMINISTRATOR'S NOTICE.

ARCANUM

EXTRACT
SARSAPARILLA.
THIS MEDICINE has acquired an extended and established celebrity throughout the country, which has been sustained by its virtues and efficacy alone, as a remedy for SCROFULA, or King's Evil, ULCERATED SORE THROAT, Long-standing RHEUMATIC Affections, Diseases of the SKIN, White Swellings, Diseases of the BONES, all Ulcerous Cases, SYPHILITIC & MERCURIAL Diseases, Affections of the Liver; DYSPEPSIA; COSTIVENESS; all CHRONIC & NERVOUS Complaints, occurring in debilitated and cachectic constitutions.

Diseases caused by an IMPURE State of the BLOOD: Over SYPHILIS, and these very disagreeable Affections resulting therefrom, and which have Sold by CHAS. CLEMENT, agent for Joliet; also by L. M. BOYCE, agent for Chicago.

DR. SPENCER'S
VEGETABLE PILLS
And Vegetable Tonic and Restorative Bitters,
ARE acknowledged by the hundreds and thousands who use them, to be not only the most mild and pleasant in their operation, but the most perfectly innocent, safe, and efficient medicines ever offered to the public. Those who once make a trial of these pills and bitters, never afterwards feel willing to be without them, which is sufficient proof of their good qualities.

In the South, where bilious disorders are so prevalent, these medicines annually save thousands of lives. They are known wherever the medical art is practiced, abroad as well as at home; but the South especially has been the grand field of their triumph, and though frequent attempts have been made to supersede them, by persons whose experience should have restrained them from tampering with human life, Spencer's pills remain as heretofore, the popular medicine of the south and west. It seems, indeed, as if every attempt at rivalry only served to enhance their reputation, to increase the vast demand which has compelled the proprietor to double the capacity of his establishment, in order to afford the requisite supply. True science, however ignorant and capricious may be its inventions, will carry the day at last; and for this reason the medicines of Dr. Spencer being the result of philosophical research and universally acknowledged medical skill, will maintain their position in the public favor, as long as disease exists, and health is considered a blessing.

In all diseases of the liver, stomach, and intestines, Spencer's pills and bitters are the only reliable preparation. They cleanse the system of its impurities, give strength and tone to all the machinery of digestion, promote healthy secretions, purify the blood, cure dyspepsia and bilious complaints of every form and character, and, as a mild yet searching cathartic, these pills are admitted by the profession to have no competitor in the whole range of medical science.

Pills 25cts, box 50cts Bitters \$1 per bottle.
Sold by Brown & Co., Joliet; and W. S. MYERS, Lockport.

TOOTHACHE
DR. LACOMBE'S Toothache Elixir is a cure and speedy cure for the most distressing complaint that can afflict the human frame. No person who has decayed teeth should be without this remedy. Some have supposed the toothache incurable without extraction. This is, however, a mistake. The experience of the thousands who have given this remedy, and who have declared if it cost \$10 per vial, they would not be without it, proves conclusively that extraction is not necessary; and that the toothache can be cured, and the teeth saved for useful purposes. Let those afflicted try, and satisfy themselves. It costs but 50 cents per vial, with all necessary directions for use.

The public may rest assured there is no danger in the application of this remedy.
Sold by Brown & Co., Joliet; and W. S. MYERS, Lockport.

DR. HULL'S
VEGETABLE FEVER AND AGUE AND ANTI FEVER PILLS

"Prove all things and hold fast to that which is good." PAUL.

NO ONE need suffer from that distressing complaint, Chills and Fever, or Fever and Ague, for it is speedily and permanently cured by Dr. Hull's celebrated Anti-Fever Pills. They never fail to cure the chills and fever the first day when taken according to directions, and do not sick or the stomach, nor operate upon the bowels. Thousands of certificates have been presented to the proprietor by physicians in general, and by the physicians of eminence, and all of them who have used them, which might be given, but let the following from Judge Forrest, a gentleman of the first respectability, in Jefferson Co., Ala. suffice.

Jefferson county, Ala., Feb. 4, 1845.

I certify that in the summer of 1843, I had a severe attack of Fever and Ague, and was for some time under the treatment of a physician, but derived no benefit from his prescriptions; my disease continued to increase in the frequency and severity of its attacks. I at last had recourse to Dr. Hull's Fever and Ague, and Anti-Fever Pills, and in using half a box was entirely cured, and have remained in good health ever since.

I afterwards had in my family several cases of Fever and Ague, and have in every instance made use of Dr. Hull's Pills, which have always immediately effected a cure.

Dr. Hull's Pills require no puffing where they are known, and where they are not, a single trial is sufficient to insure their adoption. Price \$1 per box, with full directions. A Fresh supply just received and for by Brown & Co., Joliet, and W. S. MYERS, Lockport.

DR. HULL'S
WORM LOZENGES
Children will cry for Dr. Hull's Worm Lozenges. Only read what this medicine has done. Yorkville, Gibson Co., Tenn. Dec. 21, 1843. Dr. C. E. Hull.—Some months since your agent left with me for sale, what he considered a large supply of your Worm Lozenges, but I have sold all out, and could have sold three times as many more, had I been supplied to that amount. I hope you will instruct your agent to leave a much greater supply when he comes this way again. These use in my family has been of great benefit. Edward McCord, Esq. gave some to a child four years old, and the first dose brought away between thirty and forty worms. Mr. William McDaniel had a child, when the physicians pronounced incurable, and said it would die, but the child was cured by using Dr. Hull's Worm Lozenges.

Price 25 cents per box. For sale by Brown & Co., Joliet; and W. S. MYERS, Lockport.

GUM Elastic and Web Drains, by the dozen, of pairs from a tip to 75c at the Stone Store, Joliet.

NETLEY J. Marshall's patent Line Thread for sale by the pound, at Mattheson's.
